Section 1: CAPABILITY LIST ESTABLISHMENT AND REVISION PROCESS

Establishment and Revision

This repair station may perform maintenance, preventive maintenance, or alterations on the articles listed in a Capability List. The Quality Assurance Manager is responsible for ensuring that this repair station's Capability List is consistent with the repair station ratings. Before placing an article on the Capability List, the Manager of Quality Assurance shall:

1. Determine that the article is within the scope of the repair station's ratings.
2. Perform a self-evaluation to determine that this repair station has the appropriate housing, facilities, equipment, material, technical data, processes, and trained personnel to perform the work on that article as required by Part 145.
3. Document the results of the self-evaluation on Form LGT-15 and file the completed Form as a permanent record after Accountable Manager Approval.

The Accountable Manager will review and approve the evaluation before establishing or revising the Capability List (Section 2). The Capability List is a controlled document, and once the initial list or a revision has been approved by the Accountable Manager it will be forwarded to the FAA by certified mail or electronic means at the end of each calendar quarter (March, June, September, and December).

This repair station may perform maintenance, preventive maintenance, or alterations on the articles listed on its Capability List. The following Section 2 is this repair station's capability list.

Section 2: Capability List – Landing Gear

OEM / Vendor	Nomenclature	Part Number	ATA	FAA Rating	A/C Model	Rev.
